Whatsapp: https://whatsapp.surge.sh/ws+60166688866
Marital status: Single
Gender: Male

Objective Statement

I'm Lai Weng Han, an electrical and electronic engineer undergraduate student that is experienced in the field of Web and Internet of Things. I am always curious about technology and aim to go beyond what's required of me by keeping up with the latest treneds and skillset with personal projects. This is emphasized by my passion and self-taught skills of front end development. I am capable in adapting to a rapidly changing environment.

Technical Skill

Front End Web Development

HTML, **CSS**, Sass, **JavaScript ES6**, Bootstrap, jQuery, **React.js**, **Redux**, Vue.js, Gatsby.js, GraphQL

Preferred Development Tools for Front End Web Development

Progressive Web App, **webpack**, **Babel**, Gulp, standard.js, yarn

Web Testing

Mocha.js with Expect, Jest with Enzyme, Selenium (Python or **Java**)

Web Design

Balsamiq, Sketch, Photoshop and Illustrator

Back End Web Development

Node.js (Meteor), Ruby On Rails, REST API, Mongo.db, Firebase

Cloud Computing

Heroku, Surge, AWS

Mobile App Development
iOS Application Development with Swift and Xcode

Operating System
Mac, Linux Ubuntu and Windows

Software Engineering
Basic Algorithm, Object Oritented Programming, MVC, **Git**, Vim, Command Language (Bash, Shelland ZSH), **Agile** (Scrum)

Attribute
- Familiar with **Design Thinking**, **Brainstorming** and **Lateral Thinking** (Took a course on Design and Innovative for Engineer)
- **Project Management Knowledge** (Took a course on Managing Project for Sucess)
- Understand Network, TCP/IP protocol, Data communication (Took a course on Data Communication and System)
- **Language spoken**: English, Bahasa Melayu, Mandarin
- **Language written**: English(SAM), Bahasa Melayu(SPM), Mandarin (SPM)

Working Experience
06/2017 - Current
PhytoMark
Fullstack Web Developer
http://www.phytomark.com
.
1. Rapid prototyping with Balsamiq Mockup, jQuery, HTML and CSS.
2. Built a prototype server for real time database with Meteor, MongoDB and React.js.
3. Set up a website on Front End part with jQuery, HTML, CSS and Cloud Hosting.

03/2016 - 07/2016
Seven S Mega Auto
Web Developer
http://7s.my
1. Bought domain and setup hosting for the company.
2. Setup website with Wordpress, HTML, CSS, JavaScript.
3. Setup SEO for the company's website.
4. Photo editing for luxury cars.
5. Setup E-commerce platform for the company .

Personal Project

Personal Project are for learning purpose and testing out new technologies.

Util
(webpack, React.js, React Router 4, Progressive Web App, Surge)
https://whatsapp.surge.sh/
A lightweight website that routes a link generated to respective a respective WhatsApp profile. Used Progressive Web App approach. Scored 100/100 in Google Lighthouse (Benchmark for PWA).

Shorten
(MongoDB, Meteor.js, React.js, React Router 3, Mocha with Expect, Heroku)
http://s.superoo7.com
A website that works just like google link shortener. (http://goo.gl)

IoT-lights
(Swift, C/C++, Bootstrap)
https://github.com/superoo7/iOT_light
A weekend project to setup an iOS App and website to control lights of a microcontroller.

Smart Aquarium
(Java, C/C++, Python, Linux Raspbian)
https://play.google.com/store/apps/details?id=com.ttcmotor.aquariumsystem
Created a website and an android app for monitoring the sensors of the aquarium with Raspberry Pi.

ToDoApp
(Ruby On Rails, PostgreSQL, Heroku)
http://to-do-superoo7.herokuapp.com/
A simple to do app made with Ruby On Rails.

Education

2015 - 2017
Taylor's University (Twinning)
Bachelor of Electrical and Electronic Engineer
CGPA 3.35
Achievement:
- Silver Prize for PERINTIS 2016
- Certificate of Computing Application for Engineer from Melbourne University

2014
INTI International University
South Australian Matriculation (SAM)
ATAR 96.05

2009-2013
SMK Tinggi St. David
SPM
10 A's
